RNA detection of the coronavirus SARS-CoV-2

RNA of the coronavirus SARS-CoV-2 not detected

a1 - 18:49 15-02-2021

The test was performed with a TaqPath™ COVID-19 RT-PCR Kit, using a Real Time PCR method.

The test allows to detect the N, S and ORF1 genes of the SARS-CoV-2 virus.

The test is performed using a negative, positive and internal control.

The test has a CE-IVD certificate.

The results of the test apply only to the tested sample.

The results of the test should be consulted with a doctor.
